

REQUEST AND RECOMMENDATION

ONE YEAR OPTION

600- 699 Clock Hour Programs – IT Support Services

Background:

To provide another option for adult students to apply prior learning toward a degree, Ohio legislators established what has come to be known as the One-Year-Option through Section 363.120 House Bill 59 of the 130th General Assembly. The Chancellor of the Ohio Department of Higher Education, in consultation with the Superintendent of Public Instruction and the Governor's Office of Workforce Transformation, was tasked to establish a One-Year Option credit articulation system in which graduates of Ohio's adult career-technical institutions who complete a 900-hour program of study AND obtain an industry-recognized credential approved by the Chancellor will be able to receive 30 technical semester credit hours toward a technical degree upon enrollment in a public institution of higher education. The Chancellor was also to recommend a process to award proportional semester credit hours for adult career-technical institution students who complete a program of study between 600 and 899 hours AND obtain an industry-recognized credential approved by the Chancellor. The Chancellor convened a broad group of stakeholders to develop a system of articulation for the One Year Option that was presented in a report to the legislature called, *"Getting to 30: Establishing a One Year Option Credit Articulation System for Ohio."*

In order to implement the system of articulation developed with the stakeholders as well as address accreditation requirements for degree granting institutions, the Chancellor convened Credit Affirmation Teams (CATs) to conduct a peer review of programs and certifications for affirmation for a block of 30 semester hours of technical credit. The CATs were comprised of faculty and administrators from Ohio Technical Centers (OTCs) and an equal number from public degree granting colleges and universities in Ohio. The CATs were organized by four discipline clusters: Health and Allied Health, Building and Industrial Technology, Business and Information Technology, and Services. They were charged with reviewing the certifications and, if necessary, program content, to affirm that students completing the selected program at an Ohio Technical Center and earned approved certifications had demonstrated competencies equivalent to technical credit. CATs affirmed that programs over 900 hours, articulated to a block of 30 technical credit hours. For programs between 600-899 credit hours, the review resulted in a proportional amount of credit hours being awarded. This technical credit would then be granted, as a block, upon enrollment in a degree granting institution. Additional subject matter experts were consulted when core team members did not have sufficient content knowledge of the program being reviewed.

Recommendation

As detailed in the attached template, the Business and Information Technology Team recommends that students will be eligible for a block of 20 semester hours of technical credit towards an *Associate of Technical Studies in Information Technology* when:

- the student has successfully completed a 600- 699 clock hour program in IT Support Services at an Ohio Technical Center.

And currently holds the following credentials:

- CompTIA Network+ N10-006
- CompTIA A+ 220-801, 220-802

Please note all credentials must be current, valid, and in good standing.

One-Year Option
Certification Affirmation Template

Preamble:

The Business and IT Credit Affirmation Team reviewed associated credentials for the program area, Information Support and Services (IT). With subject matter experts and representatives from Ohio Technical Centers and Community Colleges, as stated below, the group surveyed credentials associated with 600- 699 hour programs. Credential preparation and competencies from similar technical courses at Community Colleges were reviewed.

The consensus of the team was that an array of IT-related industry-recognized credentials are available for IT programs to use. However, the team determined that three credentialing bodies, CompTIA, Microsoft, and Cisco met the rigorous standards necessary for affirming credit.

Thus, it is the recommendation of the team that a student who completes a 600- 699 hour program obtains the two Core CompTIA Credentials (CompTIA Network+ and CompTIA A+) should be granted 20 technical hours towards an Associate Degree of Technical Studies.

The required **Core CompTIA Credentials** include:

1. CompTIA A+ certification, students must pass both of the following tests:
 - CompTIA A+ 220-801
 - CompTIA A+ 220-802
2. CompTIA Network+ certification, students must pass the following test:
 - CompTIA Network+ N10-006

****Important note:** It is the intent of the Ohio Department of Higher Education to review the list of credentials regularly, but because the Information Technology field may experience frequent updates, the credentialing bodies may have modified some of the exams listed. If any of the listed credentials are updated, please consider the amended credential as eligible to satisfy proof of student competency.

The Program Affirmation is designed to provide a common matrix for a peer review process acceptable to the Higher Learning Commission to soundly affirm awarding semester hours of technical credit for Ohio Technical Center graduates who are eligible for the One Year Option. The template should be completed for every program/subject and signed by the co-chairs of each of the four-cluster program areas for every Industry-recognized credential and program reviewed.

Please note: All Ohio Technical Centers must be accredited by one of the following: [Council on Occupational Education \(COE\)](#) and/or [Accrediting Commission of Career Schools and Colleges \(ACCSC\)](#).

CompTIA Network+

This exam will certify that the successful candidate has the knowledge and skills required to implement defined network architecture with basic network security. Furthermore, a successful candidate will be able to configure, maintain, and troubleshoot network devices using appropriate network tools and understand the features and purpose of network technologies. Candidates will be able to make basic solution recommendations, analyze network traffic, and be familiar with common protocols and media types.

CompTIA Network+ N10-005 Competencies

Domain	% of Examination
1.0 Network Concepts	21%
2.0 Network Installation and Configuration	23%
3.0 Network Media and Topologies	17%
4.0 Network Management	20%
5.0 Network Security	19%
Total	100%

For additional information on competencies, please see http://certification.comptia.org/docs/default-source/exam-objectives/CompTIA_N10-005.pdf

CompTIA Network+ N10-006 Competencies

Domain	% of Examination
1.0 Network architecture	22%
2.0 Network operations	20%
3.0 Network security	18%
4.0 Troubleshooting	24%
5.0 Industry standards, practices, and network theory	16%
Total	100%

For additional information on competencies, please see http://certification.comptia.org/docs/default-source/exam-objectives/comptia-network-%28n10-006%29_examobjectives.pdf

Rationale:

- 1) CompTIA A+ and Network+ are accredited by [American National Standards Institute \(ANSI\)](#) to show compliance with the ISO 17024 Standard and, as such, undergo regular reviews and updates to the exam objectives.
- 2) The credentialing exams are valid, reliable, and peer-reviewed regularly to ensure that the content accurately measures the intended competencies.
- 3) The CompTIA Network+ and A+ exams are administered by a secure, well respected, third-party testing company (Pearson Vue) and are primarily delivered in computer-based format to increase security & better maintain up-to-date content delivery.
- 4) The CompTIA A+ and CompTIA Network+ certifications are a result from subject matter expert workshops and industry-wide survey results regarding the skills and knowledge required of an entry-level IT professional.

5) It is recommended by CompTIA that CompTIA Network+ candidates have CompTIA A+ certification or equivalent knowledge and have at least 9 to 12 months of work experience in IT networking. Taking the reliability of the exam, rigor of the program, and the review of content, the Business and IT Credit Affirmation Team believes that attaining the CompTIA A+ and Network+ credentials AND three of the additional credentials listed below following completion of a 600- 699 hour Ohio Technical Center IT program to be equivalent to a block of 20 technical credits for the One Year Option.

ONLY IF NECESSARY TO AFFIRM 20 CREDITS---STEP TWO: PROGRAM-RELATED COMPETENCIES OBTAINED OUTSIDE OF PRIMARY CREDENTIAL
